1.0 APPROVAL SIGNATURE

This document is prepared by the Process and Validation and GMP compliance team of "NNE Pharmaplan India" to satisfy the customer requirement for the project "Revival of BCG Vaccine Manufacturing Facility" (**Project number:-110729**) of BCG Vaccine Laboratory, Guindy, Chennai under the authority of their Project Manager. Hence, this document before being effective shall be approved by the QA team and authorized by the appropriate Project Authority.

2.0 EQUIPMENT DESCRIPTION

The semi-automatic vial inspection machine for lyophilised vials. This machine will be used for vial inspection of lyophilised vials with the help of white board. The machine shall be of intermittent motion as operator intervention is required. The machine shall have two conveyors which are driven by motor.

S. No.	Description	Purpose
1.	Vial infeed unit	Infeed tray to feed turn table
2.	Buffer table	To hold vials at for one hour operation
3.	Turn table	To unscramble the vials in two line feed
4.	Screw feed conveyor	To move the vial at particular interval (Two numbers)
5.	Inspection hood	Inspection hood with magnifying glass, illumination light and white board.
6.	Pause, Reject and Pass buttons	Pause- To stop the conveyor moment while inspecting the vials Reject- To reject the defected vials Pass- To start the conveyor moment
7.	Reject chute	Manual reject chute shall be provided with collection bin to avoid faulty vials in good vials
8.	Out feed tray	To collect the vials
9.	Digital Counter	Digital counter shall be provided to count the vials at the in- feed and out-feed area

The machine shall be used for vial inspection of vials to check following defects:

- Particles, air bubbles in the glass body
- Cracks in the glass body
- Particles in the product
- Crimping fault
- Cake pattern

All points of the IRS except the below mentioned would be applicable for the equipment

- 4.1.11
- 4.1.17
- ASME-BPE
- ANSI / NSF 49-2008, ISO 14664
- 5.4 - Material of constructions –Please refer the section: Specific requirement.
- 5.1 - Table 2, point 2,6 and 8

Note:

I.	This Technical Specification is the basis for an inquiry to a vendor and therefore the basis for the vendor's proposal.
II.	The vendor is asked to state in "REMARKS" column with "yes" if the described requirement will be completely fulfilled and with "no" in case the requirement will not or cannot be fulfilled with the proposed equipment. In case of an deviation a comment must be inserted or enclosed as a separate annexure by referring to the respective URS specification number.
III.	The vendor must clearly comment each item of the Technical Specification. The comments must be in English language. If extra cost for necessary options becomes necessary the item must be clearly stated.
IV.	In case that the requirement includes a question or request or information from the vendor, the answer / information should be stated in the "REMARKS" column.
V.	The final version of this document including the vendor's comments will become basis of a potential purchase order or contract.
VI.	The Technical Specification serves to define a summary of all vendors' requirements concerning scope of delivery and services.
VII.	The vendor is responsible for technically unobjectionable function of the equipment. This TS is not intended to dictate a technical design to the vendor. If agreed upon with the vendor, the vendor can apply his practically proven design.
VIII.	<p>Special Instruction</p> <p>a. If no comments against any specification shall be considered as "NO" and</p> <p>b. If there is no reply / comments against the complete URS by the vendor then it shall be treated as unresponsive / technically non-compliant and rejected.</p>
IX.	All the instruments and controls mentioned in the URS(s) are expected to be standard supply and part of your standard equipment model. In case of any deviation or redundancy or additional scope of supply is noticed, vendor is required to obtain clarification from HBL before submitting the quotes.
X.	The makes requested are standard international makes. In case of any deviation, vendor to seek clarification from HBL before submitting the offers.
XI.	Refer document Installation Requirement Specification and Specific Instructions with URS; NPI_110729_IRS_BCG_01
XII.	Refer Tender document with URS; NPI/110729/EQP/TD/xx

Specifications	Remarks
----------------	---------

3.0 PROCESS DESCRIPTION

3.1 Input & Charging method

3.1.1 There will be manual loading of vials at the infeed tray of the Semi-automatic Inspection Machine.	
--	--

3.2 Brief Process Steps

3.2.1 Vials will be fed on infeed tray to turntable which will singularise the vials and transport the vials on screw conveyor (Two numbers of conveyors)	
---	--

3.2.2 Vials on screw conveyor will be transported further on inspection hood with particular space intervals	
--	--

3.2.3 The operator will check the following defects <ul style="list-style-type: none"> ➤ Particles, air bubbles in the glass body ➤ Cracks in the glass body ➤ Particles in the product ➤ Crimping fault ➤ Cake pattern <p>Note: Vials shall inspect, which are coming from two different conveyors by sitting opposite to each other.</p>	
--	--

3.2.4 The inspection of vials will be controlled by 3 buttons- Pause, Reject and Pass buttons	
---	--

3.2.5 Good vials will be transported further to out feed tray.	
--	--

3.2.6 Operator will manually pick the defected vials and transport it to the reject ion chute to collect it separately in rejection bin	
---	--

3.3 Output & Discharging method

3.3.1 The output is collected on the out feed Tray	
--	--

4.0 PRODUCTIVITY REQUIREMENT

4.1 Desired/ suggested capacity

The machine is with the below mentioned outputs:- <ul style="list-style-type: none"> • 120 Vials per minute on ISO 2R (Set point will be 60-120 vials per minute) <p style="text-align: center;">Format: Ø16mm, Height: 35mm</p> <p>Vendor should also suggest the best possible maximum output since vials shall be collected manually at the out feed of machine which will be a standalone Machine.</p>	
---	--

4.2 Standard batch size

The Batch production is required of ISO 2R vial size. 40,000 vials/ batch	
--	--

Specifications	Remarks
-----------------------	----------------

4.3 Change Over Time	
-----------------------------	--

Not Applicable	
----------------	--

4.4 Other Productivity Requirement	
---	--

The equipment shall be able to operate for 24 hours	
---	--

5.0 CONTAINMENT	
------------------------	--

Not Applicable	
----------------	--

6.0 GMP REQUIREMENTS	
-----------------------------	--

6.1 Process control	
----------------------------	--

Not Applicable	
----------------	--

6.2 Failure mode detection	
-----------------------------------	--

The vial inspection machine should essentially have the necessary provision for adjustment / control of the following critical process parameters:

6.2.1 Emergency switch shall be provided	
--	--

6.2.2 In case, out feed tray is full, notification shall be provided	
--	--

6.2.3 In case, in feed tray is empty, notification shall be provided	
--	--

6.3 In - Process control	
---------------------------------	--

Not Applicable	
----------------	--

6.4 Level of instrumentation	
-------------------------------------	--

Sufficient and suitable instrumentation for the process, safety and productivity control as indicated in the following table:

Type of control	Purpose	Instrumentation
Counter	To count vials at the in-feed station	Proximity sensor
Counter	To count vials at the out feed station	Proximity sensor (Provision to collect rejected vials)
Conveyor speed	To control the conveyor speed	Variable frequency drive

6.5 Batch data display and record printing	
---	--

Not Applicable	
----------------	--

HLL LIFECARE LIMITED, CHENNAI

Revival of BCG Vaccine Laboratory, Guindy, Chennai

	User Requirement Specifications				
	Equipment/System	Semi-automatic Vial Inspection Machine			
	Identification	FG-VIM 01	Document	URS/ FG-VIM 01	
	Effective Date	2013-12-18	Revision	05	

Specifications	Remarks
----------------	---------

6.6 GMP requirements (Others)

6.6.1 Space below the equipment shall be sufficient for the accessibility of cleaning	
---	--

6.7 Specific requirements

6.7.1 Main machine frame and turn table shall be of SS 304	
--	--

6.7.2 In feed turn table shall be provided with in feed provision. Turn table shall be provided with Variable frequency drive.	
--	--

6.7.3 The buffer table in the in-feed should be able to hold at for one hour operation and vial should automatically move in to the conveyor with help of the guiding arm.	
--	--

6.7.4 Vendor shall provide the dimension of the turn table and capacity of the turntable as per capacity mentioned	
--	--

6.7.5 Transfer arrangement i.e. screw conveyor shall be provided with intermittent motion	
---	--

6.7.6 Machine shall be provided with two conveyors which are driven by motor connected with a VFD rating 20 vials/min or 60 vials/min (or more)	
---	--

6.7.7 Intermittent motion ergonomic switch shall be provided to stop-start the conveyor. It can be of foot paddle type	
--	--

6.7.8 Inspection hood shall be provided with the following requirements: <ul style="list-style-type: none"> ➤ High quality magnifying lens with scratch proof and the flexibility of adjustment according to the operator ➤ Background (top, bottom) illumination - CFL ➤ White board with scratch proof coating ➤ The vials should be in inclined position and it should rotate 360° within in the viewable area. ➤ The angle of tilting and speed of rotation of vial should be variable. ➤ The lyophilized cake should not be disturbed by speed of rotation of vials. 	
---	--

6.7.9 Rejection chute along with collection bin shall be provided.	
--	--

6.7.10 Control panel shall be provided with emergency switch along with intermittent ergonomic switch.	
--	--

6.7.11 Digital counter shall be provided to count the vials at the in-feed of the machine along with visual indication on control panel.	
--	--

6.7.12 Digital counter shall be provided to count the good vials at the out feed of the machine along with visual indication on control panel.	
--	--

6.7.13 Working height of the machine shall be 900±30mm.	
---	--

6.7.14 Easy access for cleaning and maintenance.	
--	--

6.7.15 Equipment design must realize no breakage of glass vials.	
--	--

7.0 CONSTRAINTS

7.1 Equipment location and available space

This equipment will be installed in the Fill-Formulation Area of Revival of BCG Vaccine Laboratory, Guindy, Chennai.

Equipment Location: Ground floor-Formulation

Room name: Inspection room
 Room No. FG019
 Room dimension: 6900 mm x 4465 mm
 Room height: 5500 m
 False ceiling height: 2400 mm

Physical condition of the rooms:
Coding & Labelling

1. Class: EU Class "D"
2. Differential Pressure: 25 Pa
3. Temperature maintained: 22°C ±2°C
4. Relative Humidity: <55% RH

The equipment location is indicated in the relevant block of the layout enclosed as URS Annex-1.

7.2 Utility

➤ Electricity: _____ (Report Requirement)
